CANADIAN AND UNITED STATES

TARIFFS ON SELECTED AGRICULTURAL PRODUCTS

Canada Department of Agriculture  
Economics Branch

## PREFACE

This publication is designed as a reference handbook to the Canadian and the United States customs tariffs on agricultural products. The more important products making up the cross-border movement between the two countries are included but the list is by no means exhaustive. For products not shown in the publication the respective Canadian or United States tariff schedules should be consulted. It is from these schedules that the material in this handbook has been drawn.

In addition to tariff rates this publication also shows any major non-tariff barriers such as prohibitions, quotas or import licensing requirements. Special trade agreement rates applicable to certain Commonwealth countries are also shown.

The tariff rates in this handbook shown directly opposite the commodity description represent those in effect at the time of publication. Any further reductions to take place at a later date due to the staging process of the GATT Kennedy Round are indicated below these rates. It should be noted however that on and after June 4, 1969, the Canadian tariff reduction arising out of the Kennedy Round were fully implemented, thus the staging indicated only applies to the tariffs of the United States.

While an attempt has been made throughout the publication to show the comparable Canadian and United States tariffs applicable to each given commodity, in some cases, especially basket categories, this has not been possible. In these cases no comparable tariff item is shown.

The material in this publication was compiled by Mr. D.L. Bolton of the Economics Branch.
